My Note Games is the best note reading app out there! A great introduction to note reading for ALL clefs - treble, bass and alto too. Buy the bundle and you receive Tap that Note, Play That Note, Play A Carol and Play A Day. Well worth the cost...Starts off simple but each lesson builds on the previous note learned. Keep practicing and all levels get unlocked.

In Play That Note you chose the instrument. Set it up for recorder and you have to play the notes on your recorder! Tried it with instruments that my students are playing in band - trumpet, violin etc. My students love setting it up on the 'real' piano and playing along with the ipad drills. A great way to introduce or build upon music note reading skills and a great sight reading tool. Hopefully, rhythmic patterns will be added in the future. A fun and educational way to get students to practice.
